

Amendments to the Specification

Page 1, line 3, replace the heading "TECHNICAL AREA" WITH --Background of the Invention--.

Page 1, line 14, delete "STATE OF THE TECHNOLOGY".

Page 3, line 24, delete "THE PRECEDING ISSUES HAVE BEEN SOLVED AS FOLLOWS".

Page 4, line 4, replace the heading "THE SOLUTION'S MOST IMPORTANT CHARACTERISTICS" with --Brief Summary of the Invention--.

Page 4, line 13, replace the heading "EXPLANATION OF THE DRAWINGS" with --Brief Description of the Several Views of the Drawings--.

Page 4, line 25, replace the heading "PREFERRED DESIGNS AS PER THE PRECEDING" with --Detailed Description of the Invention--.

Page 3, insert the following paragraph between lines 23 and 25: --The innovator has earlier taught about the base idea

in WO-A-00/31426, and has since that time developed the concept according to the present invention.--

Page 14, replace the paragraph at lines 8-16 with the following paragraph:

-- The purpose of the present invention is to increase the loading possibilities for the ball bearing. This can be done by shaping each outer surface presented by the side by side loops to give the maximum contact between the ball and the wire. In other words, so that the maximum contact between the ball and the outer surface is achieved, the surface in a groove interacting with a rotatable unit being spherically shaped that up to maximum possible contact is obtained between the unit's outer surface and the corresponding outer surface of the groove, the contact surface of each loop should more or less approach the spherical or cylindrical.--
